

Public Works

For more than a century, the County has been responsible for managing a road system, and for over 75 years, it has supervised a flood protection system. San Bernardino County Public Works encompasses various departments, including Transportation, Flood Control, Surveyor, Solid Waste, and a new addition in 2020—Special Districts. The primary duties of Public Works involve the operation and maintenance of county roads, the management of special transportation projects, the oversight of subdivision maps and survey records through the Surveyor's Office, the administration of the county's solid waste system, and the upkeep of an extensive system of flood control and water conservation facilities. Additionally, the Special Districts Department delivers essential programs and municipal services to address both current and future needs in the communities it serves.

MISSION STATEMENT To enhance the quality of life for our communities by developing and maintaining public infrastructure, and providing a variety of municipal services that complements our natural resources and environment.

VISION Lead the way to a thriving community through innovation in public works, fiscal responsibility, and environmental stewardship.

VALUES The embodiment of our core values will allow us to have a positive IMPACT on the citizens of our community.

TRANSPORTATION

Maintain the level of safety and maintenance for county maintained roads to help ensure the motoring public's well being.

- Planning
- Traffic
- Design
- Environmental
- Construction
- Operations
- Permits

FLOOD CONTROL

Protecting lives and infrastructure through efficient flood control measures, incorporating water conservation, promoting community education, collaborating with stakeholders, and ensuring regulatory compliance.
