

## Flood Control District

**Noel Castillo, P.E.**  
Chief Flood Control Engineer

**David Doublet, M.S., P.E.**  
Assistant Director

# PUBLIC NOTICE – PROJECT FACT SHEET

**DATE:** September 23, 2024

**PROJECT LOCATION:** San Timoteo Basin just east of the intersection of San Timoteo Canyon Road and Pilgrim Road in the City of Redlands, see attached project location map.

**PROJECT DESCRIPTION:** The project involves the repair of approximately 1,440 linear feet of damaged southern levee between San Timoteo Basins 16, 17, 18, and up to 520 linear feet upstream of Basin 18, to address significant erosion and scour. The levee repair includes compacting native soil and/or fill material, installation of a filter fabric material with un-grouted rock, grouted rock drop structures, installation of native soil cover along the slope, and removal/disposal of approximately 15,000 cubic yards of deposited earthen material.

**CLOSURE INFORMATION:** Lane closures may be required during construction which may cause delays; however, traffic control will be established on each road to direct motorists along one 11-foot lane in both directions.

We encourage you to allow additional time in your commute schedule for possible delays and to drive with caution and reduce speeds through work zones. We regret any inconvenience this work may cause you, and we look forward to the timely completion of this project, which will enhance the quality of life in our local communities. Thank you for your patience and cooperation in assisting us in constructing this project.

**ESTIMATED START OF CONSTRUCTION:** Fall 2024

**COUNTYWIDE VISION:** This project was approved by our Board of Supervisors upon the passing of the County's 2024-2025 budget. This project is in line with the Countywide Vision of a sustainable system of public safety. In its dedication to the Vision, the District is continuing its ongoing efforts of constructing improvements on the San Bernardino County Flood Control District maintained drainage facilities.
